Continuation of 3. NOTE: Claim 15 amendments were not all properly underlined.

13. Continued: The motivation to combine the references is the mere substitution of the brassiere fasteners to achieve a desired aesthetic effect.

Continuation of 13. Other: Applicant's arguments have been duly noted. However, the specific brassiere structure in combination with the specific fastener structures have not been clearly claimed. The Ophir patent discloses a fastener which is to be used as a fastener as applicant's. Applicant is claiming a fastener shape just as Ophir discloses. The Ophir fastener has utility even though the structure was patented as a design. The Ophir fastener also discloses a "flange" as broadly claimed where in the edge is a rim that would guide a strap placed between its components as broadly claimed. The exact brassiere structure with the back band and shoulder straps in addition to the exact structure of the fasteners and their relationship with the back band and shoulder straps must be claimed. Such as claiming the brassiere structure in combination with a fastener etc. The fasteners disclose the claimed shapes as broadly claimed. The structures are fasteners which can be used on brassiere straps that are intertwined in the arms of the fasteners as desired and as claimed. Applicant is arguing more than what has been claimed when describing the component parts and the structural shapes such as the "heart" structure..
